ALTIVS IT RECEIVES CERTIFICATION IN RISK AND INFORMATION SYSTEMS CONTROLS (CRISC)

Long-standing risk and security auditors, Altius IT, receive the CRISC (Certification in Risk and Information Systems Control) designation.

Costa Mesa, CA – Altius IT has been awarded the coveted Certification in Risk and Information Systems Controls (CRISC) designation.

The CRISC designation is awarded to professionals who exhibit exhaustive experience in enterprise risk and their professional ability to design, implement, monitor, and maintain IS controls to mitigate such risk.

“Risk and the management of risk play a highly critical and central role in many of today’s businesses. Effective business managers who are poised to take their organizations into the new decade will need to balance risk and reward in a smart and controlled way. The highly respected CRISC certification simply reaffirms our role in guiding organizations through those daunting decisions. We are proud to be one of the few firms to have received this distinguished designation,” says a former president of Altius IT.

“The CRISC certification is something that many organizations have told us they respect. When organizations are evaluating their best security and risk partner, those are things that really stand out, just like the fact that many of our team members are brilliant IT security and risk thinkers. We have a history of being one of the most well-respected, trusted partners around.”

About CRISC (Certification in Risk and Information Systems Control) The CRISC is designed for IT professionals with experience in risk identification, response, and monitoring; and IS control design, implementation, monitoring, and maintenance.

CRISC-certified professionals have the proven experience and knowledge to help enterprises accomplish business objectives such as:

- Effective and efficient operations
- Designing, implementing, monitoring, and maintaining risk-based, efficient, and effective IS controls
